

Coon, C. A. C., Mahoney, P. J., Edelblutte, E., McDonald, Z. and Stoner, D. C. 2020. Predictors of puma occupancy indicate prey vulnerability is more important than prey availability in a highly fragmented landscape. – *Wildlife Biology* 2020: wlb.00540

## Appendix 1

Data A1. Minimum and maximum number of active cameras by grid cell and season.

Data A3. Receiver operating curves and area under the curves for each of the best models for each species during each season. Puma models performed well while the deer models performed poorly.
