Appendix 1

We report the habitat distribution and the location of transects in the four study areas.
Figure A2. Casentino
Figure A3. Monte Arcosu.
Figure A4. Colli Euganei.
A. Group at about 15 m.  
B. Group at about 10 m.  
C. Group with adults and piglets.  
D. Group at 30 m.  

Figure A5. Group of wild boar recorded by a thermocam at different distances and with different composition.
Figure A6. The %CV of density estimated per study area and habitat as a function of effort (total number of km walked, cf. Table 1).
